DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of raised studs extending from the surface must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13 and 15 are rejected under 35 U.S.C. 103 as being unpatentable over United States Patent Application Publication 2002/0128664 Moghadam in view of United States Patent 5,944,028 Gebhard.

Moghadam discloses the invention substantially as claimed being a hair removal device, comprising: a spiral spring (12) with first and second plastic handles (18) described in paragraph [0019] shown in figures 1-3 of Moghadam. Moghadam describes the handles as having raised projections (20) and grooves (22) that form an irregular or rough surface that facilitates gripping.

In regards to claim 15, Moghadam discloses the same invention being a hair removal device with all the claimed structure. Claim 15 recites that "the device is usable to remove hairs by expanding the device to the expanded configuration via the first and second handles, receiving a hair in the spring-like mechanism while the mechanism is in the expanded configuration, and entrapping the hair within the spring-like mechanism by allowing the mechanism to return to the unexpanded configuration," which is considered intended use and not give patentable weight because the Device of Moghadam is fully capable of performing this process.

However, Moghadam does not disclose a plurality of raised studs.

Art Unit: 3738

Gebhard teaches the use of a handle with raised bumps in the same field of endeavor for increased gripping. It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the raised bump portions of Gebhard with the handles of Moghadam in order to provide the user with improved grip.

Response to Arguments

Applicant's arguments with respect to claims 10-13 and 15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
